HAIR LOSS OPTIONS

OPTION	SOLUTIONS
 PRP - Platelet-Rich Plasma	Treatment derived from a person's own blood platelets to enhance hair growth. Research is continuing to progress regarding the use of PRP's ability to attract, stimulate and orchestrate stem cell activity to improve wound healing and naturally rejuvenate skin and hair follicles.
 Scalp Makeover™	Individual hair and scalp evaluation and custom corresponding treatment applied to optimize the health of the scalp and the beauty of the hair and/or to resolve an itchy, flaky, oily or dry and/or sensitive scalp condition.
 Hair Transplant 'FUE'	Minimally-Invasive Hair Transplantation – “FUE” Procedure (Follicular Unit Extraction) leaves no strip scar, no linear scar. FUE is a much less invasive procedure than a strip procedure. FUE heals more quickly and has less activity restrictions postoperatively.
 Hair & Scalp Cranial Prosthesis 'CNC'	Classified as a medical device by the Italian Ministry of Health, the unique 'CNC' by CRLAB is made in Italy with the highest quality hair, stitched strand by strand, in an ultra-thin medical-grade FDA-cleared synthetic base, customized exactly to your scalp for a perfectly comfortable fit. Once made and applied using a medical-grade FDA-cleared adhesive, the hair is professionally cut and styled for a seamlessly undetectable and beautiful result

WHAT IS HAIRCHECK®?

- Scientific hair measurement
- Takes only a few minutes
- Painless, no cutting
- Track progress x3 months
