

# FORMULA 82M MINOXIDIL

## Directions for USE of Formula 82M

1. Formula 82M should be applied twice a day, once in the morning during your morning grooming routine and once in the late afternoon or early evening.
2. Unless otherwise directed, apply 20-30 drops directly to a dry or towel-dried scalp twice a day.
3. Apply the product while in an environment that is NOT humid (i.e. avoid applying the solution in the bathroom after a shower where humidity is high).
4. To apply, part the hair using a comb and apply a small amount at a time directly to the scalp along the part-line.
5. Avoid dripping or “pooling” of the medication by taking extra care NOT to apply excessive amounts in one area.
6. Take extra care to avoid applying the medication onto the hair fibers.
7. There is no need to rub or massage the solution into your scalp; simply allow the drops to penetrate into the scalp accordingly.
8. Allow product to partially absorb (6-12 minutes) before applying other hair products and/or blow-drying your hair.
9. Do not shower, swim or otherwise wet your scalp for three hours after applying Formula 82M to allow ample time for the solution to fully absorb. Similarly, also avoid athletic activities, steam or sauna for three hours.
10. **Avoid the use of Formula 82M for 3 days before and after chemical coloring or perming treatments.**
11. Please note that upon starting or re-starting Formula 82M, a temporary period of increased daily shedding may occur for up to 10 weeks—this is usually a sign that the treatment is having the desired positive effect on the hair follicles. DO NOT discontinue the medication due to shedding.
12. To judge for yourself if you are using the correct amount of medication, each 15ml bottle should last approximately one week and each 60ml bottle should last one month.

**Follow-up appointments are recommended every 90 days to assess results. For refills or questions, please call Bauman Medical at 561 394 0024 for assistance.**

## Storage of Formula 82M

1. Store the bottles of Formula 82M in a dry and cool (65-72 deg F) place.
2. Replace cap tightly immediately after use, do not allow water or moisture to enter the bottle. NEVER rinse the applicator tip or cap with water or other cleaners.
3. To clean the bottle, you may wipe the tip, cap and/or bottle with a dry tissue.
4. When traveling with your prescription of Formula 82M, place the product in your carry-on luggage. 3.4 fl. oz. or 100ml of liquid per bottle are allowed by the TSA and medications are exempt from this limit.
5. NEVER pack Formula 82M in your checked bag as cargo sections of airplanes are very cold; extreme temperatures may affect the medication.
6. Never keep your Formula 82M in your gym bag, or the trunk or glove compartment of your car; extreme temperatures may affect the medication.
7. The shelf life of the prescription is approximately 6 months--please check your prescription for the expiry date.

**For refills or questions, please call Bauman Medical at 561 394 0024 for assistance.**
