M.D., A.B.H.R.S.

**Alan J. Bauman, M.D.,
A.B.H.R.S., Offers
World-Class Hair
Restoration,
Transplants And
Preservation Therapies**

Alan J. Bauman, M.D., A.B.H.R.S., is one of the world's leading experts in hair restoration, bringing the latest technology and decades of experience to men and women seeking to preserve or restore their natural hairlines.

"We offer a comprehensive program for all stages of hair loss," says Dr. Bauman, founder and Medical Director of Bauman Medical in Boca Raton.

One of the few physicians in the world board certified by the American and International Board of Hair Restoration Surgery, he was named the No. 1 Top Hair Restoration Surgeon in North America for the seventh year in a row in the Aesthetic Everything Awards.

Since opening his practice in 1997, Dr. Bauman has treated more than 33,000 patients and performed more than 12,000 hair transplant surgeries, using his skills and artistic talent to achieve lasting results.

"Our patients are thrilled with their natural hair regrowth," he says. "They look younger and feel better – a benefit that lasts a lifetime."

To accommodate the growing practice, Bauman Medical occupies a nearly 12,000-square-foot office with the most

advanced technology in the field. Dr. Bauman was the first physician in the United States to perform the PDOgro™ procedure for hair regrowth. This is a virtually painless "lunchtime" procedure that stimulates hair regrowth through the release of growth factors and increased blood flow using FDA-cleared PDO threads.

To restore a natural hairline, Dr. Bauman uses an artistic Follicular Unit Extraction (FUE) process to transplant thousands of hair follicles while his patients are relaxing, listening to music, watching a movie or napping.

He also offers prescription-strength topical medications, cellular and PRP therapies, and non-invasive laser treatments to preserve or regrow thinning hair. He is the co-developer of the award-winning Bauman Turbo LaserCap, the latest "next-gen" laser treatment that patients can use at home for as little as five minutes a day.

"If you are concerned about hair loss, ask for a consultation to discuss your treatment options," says Dr. Bauman. "It's important to choose the right physician in order to get the best possible results."

"Our patients are thrilled with their natural hair regrowth. They look younger and feel better – a benefit that lasts a lifetime."
